

Keep your ruler in place while you cut – use Omnigrip™

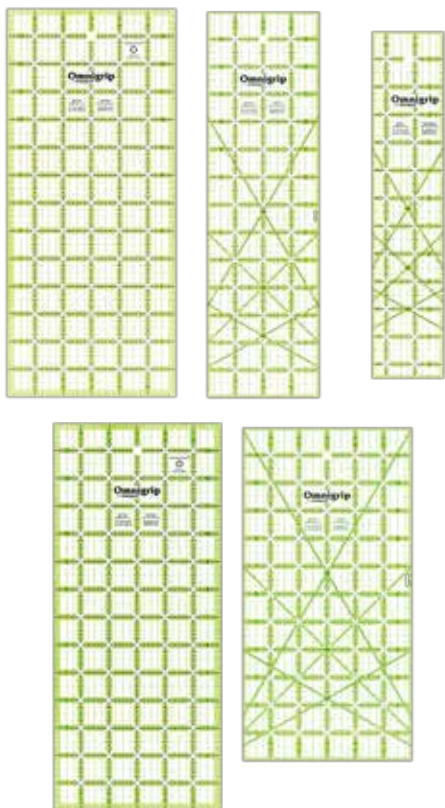

Omnigrip™ non-slip rulers offer all the essential characteristics of standard Omnigrid® rulers with one important added feature: the patented non-slip backing that holds your ruler in place while you cut. The Omnigrip™ collection includes favorite rectangle- and square-shaped rulers.

- **Edge markings** for accurate measuring
- **Laser cut edges** for smooth cutting
- **Patented double sight-lines** show on light and dark fabrics
- **Multiple degree angle lines** for easy pivot of 30°, 45° and 60° cuts
- **Left- and right-hand numbering and angle system**

Patented non-slip backing holds your ruler in place

Omnigrip™ Rectangle Rulers

Rectangle rulers are used for cutting strips and trimming fabric edges. The Omnigrip™ 6" x 24" ruler is a best-selling ruler that's ideal for beginning and advanced quilters alike. Some Omnigrip™ rectangle rulers include an additional 1/2" seam allowance. The smaller rectangle rulers are easy to manipulate for shorter strips and secondary cutting.

Omnigrip™ Square Rulers

Square rulers are used for secondary cutting of strips, and to square up finished quilt blocks. You'll find Omnigrip™ rulers ranging from 3-1/2" square to 20-1/2" square.
